

Goshen Township – Calculate Foundation Pricing

All foundations require a 3" border around all sides of the headstone.

Example 1:

Headstone size: 18" x 12"

Foundations size: 3" + 18" + 3" = 24"

3" + 12" + 3" = 18"

24" x 18" = 432 sq.in. x \$.65/sqin. = \$280.80

Example 2:

Headstone size: 46" x 12"

Foundations size: 3" + 46" + 3" = 52"

3" + 12" + 3" = 18"

52" x 18" = 936 sq.in. x \$.65/sqin. = \$608.40

Foundations can now be poured without waiting for multiple requests.

This eliminates the spring and fall only schedules.

In the past, to make pricing affordable, several requests needed to be combined.

Now foundations can be poured when a request is received.
