

CULVERT PERMIT APPLICATION

- 1) Any person installing a new driveway culvert, replacing an existing culvert, or installing culvert pipe in a township road ditch on a roadway maintained by Goshen Township must complete this application.
On roadways maintained by the Mahoning County Engineers Office, anyone installing a culvert must apply for a culvert permit through that office.
On roadways maintained by the Ohio Department of Transportation, anyone installing a culvert must apply for the permit through ODOT.
- 2) Installation of culvert pipe must be of a length and diameter approved by the Goshen Township Trustees. Normal driveway culvert size is 15" in diameter and 30' in length. However, upon visual inspection by the trustees or their representative, a larger diameter or longer length of pipe may be required. In some situations of minimal flow, a smaller diameter of pipe may be approved by the Trustees. The Goshen Township Board of Trustees are responsible for final approval.
- 3) All pipes must be installed so that the bell end of the pipe faces upstream.
- 4) Catch basins or cleanouts will be required every 150 feet or where required by the Trustees on installations spanning long distances.
- 5) All bell joints and "tie in" joints must be properly sealed.
- 6) All driveway culverts installed must be bedded with a minimum of 12 inches of slag under the pipe and the sides within the ditch must also be bedded with slag.
- 7) All construction materials, installation methods, and proper traffic control must comply with ODOT specifications, the Ohio Uniform Traffic Code, and the Goshen Township Board of Trustees.
- 8) All contractors must be properly insured and bonded.
- 9) Failure to comply with the permit requirements will result in a permit suspension. Please provide a sketch on the reverse side of this application.

CULVERT PERMIT APPLICATION

Applicants Name: _____

Mailing Address: _____

Construction address, if different: _____

Phone Numbers: (1) _____ (2) _____
